## "wu-dot1x" and Windows 7

To access the wireless network at the WU Vienna, you will need a laptop with an operating system with network software configured for DHCP and a wireless network adapter capable of 802.1x authentication.

It is extremely important that you have the latest drivers installed for your network card. Within our wireless network, you can connect using IEEE 802.11a, b, g and n-standards.

### Network password

First of all, please make sure that you have already established a network password at the Control Panel (» <https://controlpanel.wu.ac.at/>).

» Control Panel » Services » Netzwerkzugang

The screenshot shows the WU Controlpanel interface. At the top left is the WU logo (WIRTSCHAFTS UNIVERSITÄT WIEN VIENNA UNIVERSITY OF ECONOMICS AND BUSINESS). At the top right is the EFMD EQUIS ACCREDITED logo. The page title is "Controlpanel". A navigation bar shows "Angemeldet als" followed by a user icon and a "Logout" button. The main content area is titled "WU NETZWERKZUGANG". It lists the services the user is logged into: "Verschlüsseltes WLAN", "VPN-Zugang", and "Modemzugang". Below this, it shows the username as "\_\_\_\_\_@wu-wien.ac.at" and prompts the user to enter a password. There are input fields for "Passwort:" (with a masked password of 6 dots) and "Wiederholung Passwort:". A "Neues Passwort setzen" button is also visible. On the left side, there is a sidebar menu with options: "ÜBERSICHT", "ACCOUNT", "E-MAIL", "SERVICES" (expanded to show "Info Channels", "Handy Registrierung", "LDAP", "Netzwerkzugang", "Voice over IP"), and "EXTERNE LINKS". At the bottom, there is a footer: "© 2010 Wirtschaftsuniversität Wien | Kontakt".

Choose a strong password with at least 6 characters. You will then be part of the user group "Verschlüsseltes WLAN" ("encrypted wireless network").

### Locations of Wireless Access-Points at WU-Campus

We provide wireless network service all over the campus, an overview is available at

» [http://www.wu.ac.at/it/anleitungen/wlan/wlan\\_standorte](http://www.wu.ac.at/it/anleitungen/wlan/wlan_standorte)
