

## Research Events

The lecture series WU Research Talks (information in German) takes in-depth looks at current research topics. Outside experts are invited to WU to hold these talks.

In addition to the WU Research Talks, the Research Service Center holds Research Workshops (information in German), intended to provide a platform for exchanging experiences on specific topics and imparting practical skills (e.g. applying for financial aid).

Within WU's in-house training program for researchers, events are scheduled regularly which address important research issues, provide fresh inputs and impulses, and encourage discussion among colleagues.

The Career Program for WU Researchers (information in German) has also been recently re-launched.
