We'd ask presenters to limit **presentations** to **20 minutes** and commentators to limit **comments** to **5 minutes** in order to leave enough time for an **open discussion**.

Interim reflections should take no longer than **20 min**. Their purpose is the following: to pinpoint and briefly reflect on the major lines of discussions we've had up to a given point especially for those who will join the discussions at a later point and/or only for certain sessions due to different time zones.

All **sessions will be recorded** so that everyone, regardless of geographical location & time zone, can follow the panels and discussions (even if delayed). The recordings will be accessible to workshop members *only* and are *not* meant for any other use. Should anyone disagree to the recording, please let us know.
