## **MAG. ALEXANDER GÖTZ UND DR. BARBARA REDLEIN – PWC EUROPE** **SAP S/4HANA - EXAMPLES AND INSIGHTS FROM PRACTITIONERS**

SAP AG has fully re-worked its ERP system with the new version S/4 HANA.

The new 'in memory' database technology HANA is revolutionary from a technical perspective and supports new process models. Companies of all sizes and industries are analysing new opportunities and possible pitfalls in current business concepts & IT roadmaps. In our lecture we provide insights into current projects and competing business concepts in the SAP architecture. In addition the upgrade is connected with many challenges: Data migration and auditing will also be examples from this field.

Alexander Goetz is a Senior Manager, Certified SAP consultant and responsible for SAP S/4HANA in the German PwC Risk Assurance Solutions – Finance and Reporting Team.

He is also a member of the PwC Halo core team, and responsible for developing data analytics products with focus on S/4HANA readiness- and value analysis. Alexander has more than 11 years experience implementing and auditing of ERP solutions, especially SAP. He brings deep dive S/4HANA expertise and sound accounting and mechanical engineering know how.

Dr. Barbara Redlein is Managing Director at PwC Austria and has been performing audit and consulting work for more than 14 years in the area of internal control systems, enterprise resource planning software like SAP and Compliance. Her main focus lies within transformation confidence projects where she accompanies data migrations, supports in automatization of control activities and performs consulting in the area of authorisation concepts.
