

Energy Intern (German Speaker)

ALL EMEA OFFICES /
ENERGY PRACTICE – EMEA /
INTERNSHIP

We are one of the world's leading economic consulting firms. We strive to recruit and develop talented people to work together to produce meaningful economic analysis of exceptional quality, and to create a positive impact on our clients and society.

Our EMEA Energy team is spread over several European offices and has 20+ members, all of them experts in their field, from whom you can learn.

We specialise in the economy of the energy sector including electricity, gas, emissions trading and renewables. We are mainly active in Europe and the Middle East and have worked on projects in more than 25 countries.

We are involved in a broad spectrum of matters – development of renewable energy, climate change, liberalization of the power and gas industries, market design, investment decisions and due diligence, storage, electric vehicles and smart grids etc.

Our extensive expertise in the European energy market ranges from market design & regulatory issues, strategy development and market modelling to comprehensive expert work in civil and antitrust / competition proceedings.

About the Role

We are looking for an Intern to start as soon as possible. Interns join us whilst in their final year of Bachelor or Master's degree for 3 to 6 months. Please indicate in your cover letter when you would be available to start your internship and your preferred duration.

You will be working within the energy team both on the modelling capability and on policy and regulation issues. As such, your daily work will be to support the team in developing/improving models, and in analysing the impacts of energy/environment regulation in a variety of European countries.

You will be based in either Berlin, Brussels, Dusseldorf, London, Madrid, Milan or Paris and work closely with other consultants and experts located across our European offices.
