Driving Digital Transformation

THE DIGITAL ECONOMY PROGRAM AT A GLANCE

WU stands for innovation and internationality. As a pioneer in the field of the digital economy, we teach the managers of tomorrow how to be digital innovators. The Master's Program on the Digital Economy is an interdisciplinary program, focusing on topics like artificial intelligence, big data, blockchain technology, digital business models, digital law, innovation management, and cryptoeconomics. Graduates are ideally prepared to start managing digital businesses, manage the digital transformation of traditional companies, or found their own innovative start-ups.

CONTENT AND STRUCTURE

The Master's Program on the Digital Economy is a 2-year, full-time academic program aimed at graduate students with a background in business, economics, and technology. It combines aspects of economics, finance, information technology, law, management, marketing, and strategy with a focus on the digitalization of business and the economy. Working together with partners from the business community, the public sector, and civil society, it provides a practice-based education that prepares students for a digital career. 3 specializations – Information Systems, Digital Law and Economics, and Digital Strategy, Marketing, and Transformation – allow students to individualize the program according to their own interests.

CAREER PROSPECTS

WU graduates are in great demand on the job market. Employers associate WU alumni with well-founded expertise, ambition, and drive. Students in the Digital Economy program gain a solid understanding of the challenges and opportunities that the digital transformation is creating for companies and society. They learn how businesses can profit from state-of-the-art digital developments and graduate as experts in the field of digitalization.

The job profile covers a variety of digital leadership roles, including positions in digital product management, digital entrepreneurship, (IT) consulting, enterprise architecture management, digital transformation management, business development, or digital marketing in both digital and traditional companies, the public sector, NGOs, NPOs, start-ups, and consulting firms.

WHY DIGITAL ECONOMY?

Students who study the digital economy at WU Vienna do so at one of the leading research institutions for applied AI and cryptoeconomics. Students benefit not only from WU's innovation-driven focus but, above all, also from the collaborative spirit within the degree program.

“We want to give our students the expertise and methodological skills they need to help steer the path of digitalization. The decision-makers of tomorrow need to be able to perform tasks like creating and maintaining digital ecosystems, designing new digital business areas in companies, and contributing to digitalization-driven social change.”

Verena Dorner and
Axel Polleres
Academic Directors, Digital Economy
