**SIMC offers a unique blend of strategy and entrepreneurship. You will learn to use the power of your creativity to identify innovative business opportunities and develop strategies for long-term success.**

# Kick Off Your Career as a Business Leader

---

## THE SIMC STUDY PROGRAM AT A GLANCE

The master's program in "Strategy, Innovation, and Management Control" prepares tomorrow's executives for their role as organizational leaders. The program combines theory, practice, and instruction with relevant social skills, for an integrated approach to organizational leadership. Considerable emphasis will be placed on developing the ability to identify new entrepreneurial opportunities and designing and implementing strategies for achieving sustained financial performance. The program applies an inter-active teaching approach based on case studies, business projects, and business games. A strong network within the program creates a unique community spirit, which is also supported by several social events that are organized by our vibrant student community SIMConnect.

## CONTENT AND STRUCTURE

The program offers a profound education in organizational leadership.

The **first year** foundation courses provide the basis for an in-depth understanding of how companies develop corporate and business strategies (strategy development) and how they can translate their strategies into employee action (strategy implementation).

In the **second year** of their studies, students start to specialize by choosing a total of four electives, and start writing their master's thesis. In addition, a business project is organized in cooperation with our top corporate partners, which offers the opportunity to apply theoretical knowledge to real life problems. Alternatively, students can choose a garage business project course, which helps them to develop or improve a start-up idea.

## Exchange and Double Degree Programs

The international outlook and outreach that the program is characterized by also enables our students to broaden their horizon by doing an exchange semester or a double degree. As part of WU's international focus, we have developed five double degree programs in cooperation with renowned universities: Bocconi University, Italy, National Chengchi University, Taiwan, Queen's University, Canada, Universidad Católica de Lisboa, Portugal, and the University of Technology Sydney, Australia. Students completing a double degree program will receive both the WU MSc degree and a degree from the partner institution. Additionally, exchange places at one of WU's over 140 partner universities on master's level are available for students interested in gaining international experience.

## CAREER PROSPECTS

Graduates of the program have learned to think and act as entrepreneurs and strategists, and to actively contribute to organizations and lead them into the future. Our alumni network and top corporate partners also open-up additional networking possibilities, which also support the excellent career perspectives that this program has proven to create for its graduates. Our graduates typically work in the following areas:

- › Top management consulting
- › Business development/strategic management
- › Management control and financial management
- › Innovation management and organization design
- › Founding and managing their own business

**"We offer you an ambitious, internationally oriented master's program. Both in the classroom as well as in the active student community, entrepreneurial thinking and attitudes are promoted from day one."**

**Werner H. Hoffmann**  
Academic Director, Strategy, Innovation,  
and Management Control
