Supply Chain Management
Supply Chain Management as a Competitive Advantage

THE SCM PROGRAM AT A GLANCE

The Master’s Program in Supply Chain Management is unique in Europe, because it offers not only a thorough education in relevant theories and topics and techniques but also facilitates a transdisciplinary and integrated approach to help students gain a deeper understanding of supply chain-related issues from a performance perspective. Decision problems in supply chains will be considered from the point of view of different stakeholders, including suppliers, logistics service providers, and retailers.

CONTENT AND STRUCTURE

The program focuses on the analysis, design, management, and operation of supply chains or manufacturing systems. The curriculum is grounded in proven theory and methodology, best practices, and emerging innovative technologies. Students learn to chart supply chain strategies and integrated approaches to help students gain a deeper understanding of supply chain-related issues from a performance perspective. Decision problems in supply chains will be considered from the point of view of different stakeholders, including suppliers, logistics service providers, and retailers.

VISITING PROFESSORS & CORPORATE PARTNERS

CAREER PROSPECTS

The student body is made up of a broad variety of nationalities. The students currently enrolled in the program come from 20 different countries. Excellent students also have the opportunity to spend a semester abroad without extending the duration of their studies.

INTERNATIONAL ORIENTATION

The program focuses on the analysis, design, management, and operation of supply chains or manufacturing systems. The curriculum is grounded in proven theory and methodology, best practices, and emerging innovative technologies. Students learn to chart supply chain strategies and integrated approaches to help students gain a deeper understanding of supply chain-related issues from a performance perspective. Decision problems in supply chains will be considered from the point of view of different stakeholders, including suppliers, logistics service providers, and retailers.

Our graduates are well prepared to design and manage the future’s most competitive supply chains addressing economic, environmental, and social dimensions. Career opportunities are numerous and promising.

Wu. Institute of Science & Management

EUROPE QS MASTERS

30th Place in 2023

Top-qualified applicants have the chance to be offered a spot ahead of the current priority deadline (see our website for details). GPA confirmation is required.

APPLICATION DEADLINE

WU employs a rolling admissions policy, allowing students to apply from the beginning of September until spring, with the following three priority deadlines: October, January, and March.

For detailed information on the admission requirements and the application procedure, please see wu.ac.at/applicationguide

APPLICATION AND ADMISSIONS

Applications have to be submitted online and fulfill the following requirements:

Step 1 – proof of formal requirements

Applications have to be submitted online and fulfill the following requirements:

Step 2 – evaluation by panel of SCM experts

Step 2 – evaluation by panel of SCM experts

Step 3 – decision on admission

Step 3 – decision on admission

AT A GLANCE

Program type: Full-time degree program, start only in the winter semester

Duration: 4 semesters

Language instruction: English

Credits: 120 ECTS credits (incl. 20 ECTS credits for the master’s thesis)

Degrees awarded to graduates: Master of Science (WU), abbreviated MSc (WU)

Fast track – your choice for an early offer

Top-qualified applicants have the chance to be offered a spot ahead of the current priority deadline (see our website for details). GPA confirmation is required.
Supply Chain Management as a Competitive Advantage

THE SCM PROGRAM AT A GLANCE

The Master’s Program in Supply Chain Management is unique in Europe, because it offers not only a thorough education in relevant theories and their application, but also a broad range of analytical and methodological tools that enable students to think critically and independently. This program focuses on the analysis, design, management, and operations of supply chains in manufacturing and service industries, including both non-profit organizations and non-profit environments. The curriculum is grounded in proven theory and methodology, best practices, and emerging innovative technologies. Students learn to chart a course in supply chain management opportunities by using logistics and supply chain strategies.

VISITING PROFESSORS & CORPORATE PARTNERS

Students will have plenty of opportunities for in-depth research with visiting professors and experts from the business community to discuss recent issues in SCM, such as supply chain finance, outsourcing/offsourcing, supply chain analytics, sustainable supply chains, disaster relief logistics. In addition, our corporate partners also provide current topics.

INTERNATIONAL ORIENTATION

The student body is made up of a broad variety of nationalities. The students currently enrolled in the program come from 20 different countries. Excellent students also have the opportunity to spend a semester abroad, depending on the duration of their studies.

CAREER PROSPECTS

Exceptional management of a company's supply chain is an essential key to success in modern business life. After completion of the MSc program, graduates will be thoroughly familiar with the design and analysis of logistics processes, the related information and financial flows in supply chains and transportation networks in general, the design of supply chain strategies, and the management, optimization, and coordination of global supply chains.

"Our graduates are well prepared to design and manage the future's most competitive supply chains addressing economic, environmental, and social dimensions. Career opportunities are numerous and promising.”

David Bierlein and Hendrik Wilsch, Academic Directors, Supply Chain Management

APPLICATION AND ADMISSIONS

Applications have to be submitted online and fulfill the following requirements.

1. Proof of formal requirements

Applications have to be submitted online and fulfill the following requirements:

- A relevant prior degree worth at least 120 ECTS credits (incl. 20 ECTS credits for the master's thesis)
- Sufficient proficiency in English (e.g. TOEFL, IELTS)
- Mathematics and/or statistics
- Production and/or transport and/or logistics

2. Academic letter

A relevant academic letter is required that explains the student’s relevant experience and performance, as well as their suitability for the program. Please provide a recent statement of their pending ECTS credits and course titles.

APPLICATION DEADLINE

WU employs a rolling admissions policy, allowing students to apply from the beginning of September until spring, with the following three priority deadlines: October, January, and March.

AT A GLANCE

Program type: Full-time degree program, start only in the winter semester

Duration: 8 semesters

Level of instruction: English

Credits: 120 ECTS credits (incl. 20 ECTS credits for the master's thesis)

Degree awarded to graduates: Master of Science (WU), abbreviated MSc (WU)

APPLICATIONS AND ADMISSIONS

Applications have to be submitted online and fulfill the following requirements:

Step 1 – proof of formal requirements

Please direct all inquiries regarding this step to

master.application@wu.ac.at

For further details see: ww.at/scm

Step 2 – evaluation by panel of SCM experts

- Skills and knowledge in the 3 main areas of the program:
  - Production and/or transport and/or logistics
  - Management/Information systems and/or geographic information
  - Mathematics and/or statistics
  - WU Bachelor’s degrees, e.g. specializing in Production Management, Transport & Logistics Management, International SCM, Mathematical Methods, Supply Networks and Services

- Candidates who have not graduated from a bachelor’s program yet should supplement the application with a statement of their pending ECTS credits and course titles.

Fast track – your chance for an early offer

Supply Chain Management as a Competitive Advantage

THE SCM PROGRAM AT A GLANCE
The Master’s Program in Supply Chain Management is unique in Europe, because it offers not only a thorough education to relevant themes and tools in manifold techniques and skills but also a transdisciplinary and integrative approach to help students gain a deeper understanding of supply chain-related issues from a performance perspective. Decision problems in supply chains will be considered from the point of view of different stakeholders, such as suppliers, manufacturers, retailers, logistics service providers, and retailers.

CONTENT AND STRUCTURE
The program focuses on the analysis, design, management, and operation of supply chains in manufacturing and service environments. Students learn to design supply chain processes all the way from managing information flows, capital flows, and processes, the related information and financial flows in non-profit environments. The curriculum is grounded in proven theory and methodology, best practices, and professional service industries, in for-profit as well as non-profit environments. The students currently enrolled in the program come from 20 different countries. Excellent students also have the opportunity to spend a semester abroad without extending the duration of their studies.

CAREER PROSPECTS
Exceptional management of a company’s supply chain is a competitive advantage that can quickly deliver increased revenues and profits as well as cost savings, which translates to increased shareholder value. Graduates of the MSc program, therefore, will be thoroughly familiar with the design and analysis of logistics processes, the related information and financial flows in supply chains, and transportation networks in general, the design of supply chain strategies, and the management, optimization, and coordination of global supply chains.

"Our graduates are well prepared to design and manage the future’s most competitive supply chains addressing economic, environmental, and social dimensions. Career opportunities are numerous and promising."

David Bierer and Roberta Reiner, Academic Directors, Supply Chain Management
