

THE LIFE CYCLE MODEL – CHOICES AND INVESTMENT

HOW THE LIFE CYCLE MODEL WORKS

If a life cycle model is arranged for in the pension fund contract, prospective beneficiaries can choose between three different investment groups according to their own risk appetite:

	DYNAMIC INVESTMENT¹	BALANCED INVESTMENT¹	DEFENSIVE INVESTMENT¹
Chance of yield	highest	medium	lowest
Risk	highest	medium	lowest
Volatility	highest	medium	lowest
Targeted yield	2.5–7.75%	2.25-6.5%	2–5%
Targeted volatility ²	10-17%	7–12%	5–8%
Target	<p>The investment targets a higher yield over time:</p> <ul style="list-style-type: none"> ▪ for a longer investment duration ▪ for younger employees ▪ for employees, who's goal is a high yield and who don't shy risk 	<p>Over a longer period of time yields should be achieved that exceed the assumed rate of interest.</p>	<p>The goal is a stable yield, with the lowest risk of volatility:</p> <ul style="list-style-type: none"> ▪ for shorter investment durations ▪ for people shortly before their retirement ▪ for employees, who are most interested in a more stable yield
	<p>In all investment groups, pensions can increase or decrease. In the dynamic investment group, however, the changes will most probably be more perceptible than in the defensive investment group.</p>		

RISK AND YIELD STRUCTURE OF THE VALIDA LIFE CYCLE MODEL

¹ The terminology dynamic, balanced and defensive investment groups are in no way connected with the investment types of the Oesterreichische Kontrollbank.

² A statistical measure of the dispersion of returns measured by using the standard deviation. Commonly, the higher the volatility, the riskier the investment.

FIRST CHOICE

- **BEFORE JOINING THE PENSION PLAN** employees may choose one out of the three investment groups. This applies to all employees joining the plan after the 1st of September 2014. If no choice is made before joining the pension plan, your pension capital will be invested in the defensive investment group.

OPPORTUNITIES OF CHANGE

- If you are an employee, who joined the pension plan on the 1st of September 2014 or later:
Until your first change, your pension capital will be invested in the investment group you chose before joining the pension plan. If you, however, did not choose a group before joining the pension plan, your capital will be invested in the defensive investment group.
- If you are an employee, who joined the pension plan before the 1st of September 2014:
Until your first change, your pension capital will be invested in the balanced investment group.
- **The first opportunity to change the investment group** is on 1 January of the following year (preconditioned that a written statement is sent to Valida by 31 October).
- **Number of change possibilities:** The employee can choose to change his/her investment group up to three times over course of his/her working life. A possible change into or out of the secure investment and risk sharing group as well as the choice upon joining the pension plan do not have to be taken into account.
- **The last opportunity** to change the investment group is at the time of application for a benefit.

SPECIAL REGULATIONS FOR THE SURVIVING DEPENDENTS:

- The last investment group chosen by a beneficiary is also the investment group in which the capital of his/her surviving dependents is administered.
- If the employee dies before retirement, the surviving dependents can choose an investment group at the time of application for benefits.
- If the employee dies after his/her retirement, the law does not permit his/her surviving family members to choose the investment group.

Before any change can occur, Valida sends an extensive **information package** to the prospective beneficiary that describes the effects of the change. This information package also includes the form that has to be signed and returned to Valida. A **change without this information package is legally not permitted**. Therefore we kindly ask you to request the information package in time, therewith allowing enough time for the production and the delivery of the information package as well as some time for yourself to consider your choice.

**YOU WANT TO CHOOSE A GROUP BEFORE JOINING THE PENSION PLAN?
IN THIS CASE THE REGULATIONS AND PROCEDURES ARE THE FOLLOWING:**

Two months preliminary to your inclusion the WU will send you an information package as well as an employee's declaration.

- Hand in your employee's declaration (which states your decision) to the WU's payroll by no later than one week in advance of your inclusion. Make sure to use the original version of the form. The WU will then forward your decision to Valida.
- As long as the signed form reaches Valida in time before your inclusion, your capital will be invested in the investment group of your choice.

**YOU WANT TO CHANGE INVESTMENT GROUPS?
IN THIS CASE THE REGULATIONS AND PROCEDURES ARE THE FOLLOWING:**

YOU ARE AN EMPLOYEE:

You can change **every year**, however, only up to three times altogether

- If you are thinking about changing the investment group, please request the information package including the **form by 31 August at the latest**.
- If the **signed form reaches Valida by 31 October**, the change to the investment group will occur on 01 January of the following year.

YOU WILL BE RETIRING SOON:

You can change investment groups at retirement.

- If you are thinking about changing the investment group, please **request the information package** including the form **when you are applying for your pension** at the latest.
- Once you have received the information package, please **return the signed form as soon as possible** as your **pension can only be paid out after the form has reached Valida**.
- The change of investment groups occurs at the time of your first pension payment.

Please request the information package and the form here:

- via e-mail: wahlrechte@valida.at
- via mail: Valida Pension AG, Top-Kunden-Service, Mooslackengasse 12, 1190 Wien

INVESTMENT

valid from 01.01.2023¹

DYNAMIC INVESTMENT

BALANCED INVESTMENT

DEFENSIVE INVESTMENT

Initial allocation: Based on the initial allocation, the asset classes are reallocated within a set range as the market requires.

¹ The following graphs are displaying the current situation. Valida reserves the right to change investment limits and principles as needs be.

HISTORIC SIMULATION AND HISTORIC PERFORMANCE

This graph clearly demonstrates that the dynamic investment group has the highest volatility.

AVERAGE INVESTMENT YIELDS

	DYNAMIC INVESTMENT	BALANCED INVESTMENT	DEFENSIVE INVESTMENT
Average 1998 to 2022	4.07% yearly	3.66% yearly	3.63% yearly
Average of the last 10 years (2013 to 2022)	3.52% yearly	2.85% yearly	2.58% yearly

As the dynamic and the defensive investment groups have only been established in January 2008, any predating yields are a historic simulation. The data of the balanced investment groups are historic yields.

Please be aware that the data displayed is historic and cannot be used in any way to predict future outcomes.

In your pension portal we will keep you updated on how your capital is distributed in the various asset classes. Moreover, you can use this portal to check on the performance. The codes for the login are sent to you with your annual statement.
