

## Attending a course:

Source: Designed by Fatimah Aly

- a) With the help of LV-planer, Profcheck and LPIS the Wu students can choose a desired PI.
- b) After choosing a PI, the student opens LPIS to register for the PI at exactly 13:59:58. If the student does not receive a place, an alternative solution must be found.
- c) The student can request an exchange, register for the waiting list, or another PI can be chosen. If the option "other PI" is selected, the process ends there.
- d) The student then waits for the acceptance. If no course place is received, the student closes the LPIS and the process ends.
- e) Thereafter, the students visit the first lecture of the PI to meet other students, find out about the course requirements and form a group for the project.
- f) To pass the course all requirements must be fulfilled. If the requirements are fulfilled, the student will pass the course, and if not, the student will fail. At the end, the lecturer enters the grade in LPIS.
