

## Make to stock:

Source: Kummer, Sebastian et al. *Grundzüge der Beschaffung, Produktion und Logistik*, Pearson Education Deutschland GmbH, 2018: p. 249

a) In this production process, the materials have already been ordered and the products are also manufactured and finished.

b) At the end comes the customer's order. In this case the production process takes place before a customer's order is placed. For example, the production of computers.
