Linking Cost Centres and Capacities to Work Centres

Transfer the following verbal description into an ERM:

a) Cost centres (CC-#) issue activities (Act-#), whereby a cost centre can also issue several activities; each activity can be issued by several cost centres.

b) The employees (Soc-#) of a group are combined to work centres (Wrk-#), with employees being uniquely assigned to them. Each work centre can deliver one or more activities of a cost centre.

c) The enterprise defines specific capacity types (Cap-ID). Each work centre is assigned to one or more capacity types.

d) The enterprise also defines certain scheduling variants (SV-ID), which are assigned to work centres. A work centre can be scheduled only in one way.
